

Innovative **ENDOVAC-Porci**[®] vaccine helps keep pigs healthy and growing

Convert feed to marketable weight gain.

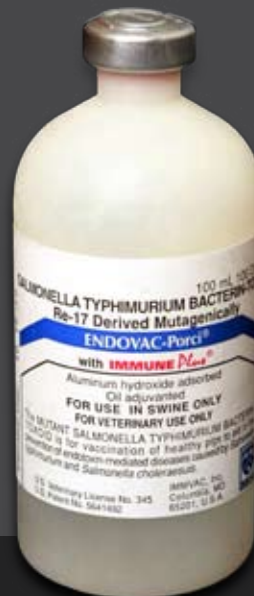

As feed prices continue to climb, converting feed into marketable gain is more important than ever to your bottom line. That's why more pork producers are protecting their pigs - and their profitability - with ENDOVAC-Porci[®] vaccine from IMMIVAC, Inc.

ENDOVAC-Porci[®] has been put to the test in a comprehensive study on more than 34,000 pigs in Missouri and Arkansas. **The results?**

- increased feed conversion ratios
- decreased mortality
- fewer lightweight pigs

Keep pigs healthy and growing with proven protection.

For more information about SEPTI-serum[®] please contact your veterinarian, visit www.immvac.com or call (800)944-7563.

ENDOVAC-Porci[®] is recommended administration at a 1mL injection in to the musculature of the healthy pigs with a second 1mL dose given 10 to 14 days later.
